SUMMARY

Python Automation Tester with 2+ years of overall experience in Python development, automation testing, and software quality assurance, including 1+ year of hands-on experience in Python-based test automation. Currently working at Wipro on the Shell Downstream project, with experience in automation frameworks, functional and regression testing, API testing, test execution, defect identification, debugging, and CI/CD testing. Previously contributed to the Johnson Johnson Medical Asia project and gained additional experience in Python Django full-stack development using Python, Django, Django REST Framework, HTML, CSS, Bootstrap, React, SQL, and SQLite. Strong in problem-solving, collaboration, API validation, and delivering reliable software solutions in Agile environments.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript

Automation Testing: Selenium , Playwright, Pytest, BDD, Cucumber, Behave, TestNG, Page Object Model (POM)

Testing: Functional Testing, Regression Testing, Smoke Testing, Integration Testing, API Testing, Manual Testing

API Testing and Web Services: REST API Testing, REST Assured, JSON Validation, API Request/Response Validation

Frameworks and Libraries: Django, Django REST Framework (DRF), React, Bootstrap

Agentic AI and AI-Assisted Development: Agentic AI for Test Automation, GitHub Copilot

CI/CD and Version Control: Jenkins, Git, Maven, CI/CD Pipelines

Databases: MySQL, PostgreSQL,SQL, Database Validation

Cloud and DevOps Tools: Azure Storage Explorer

Reporting and Productivity Tools: Allure Reports, JIRA, Microsoft Excel

IDEs: PyCharm, Visual Studio Code, Eclipse IDE

WORK EXPERIENCE

WIPRO TECHNOLOGIES, BANGALORE,INDIA March 2025 – Present
PROJECT ENGINEER – PYTHON AUTOMATION ENGINEER
Project: Shell Downstream / Shell oneMPS

- Developed and maintained Python-based automation scripts for web and API testing using a BDD-based automation framework.
- Executed functional, regression, smoke, and API testing cycles and validated application behavior against expected results.
- Developed reusable BDD scenarios and test components to improve automation coverage and maintainability.
- Validated REST APIs and JSON responses and used Azure Storage Explorer to verify test data, files, and application outputs during testing.
- Support CI/CD pipelines for automated test execution and scheduled test runs.
- Analyze automation failures, debug Python scripts, and troubleshoot test execution issues to improve reliability.
- Perform defect identification, logging, retesting, regression validation, and release verification in collaboration with QA and development teams.
- Prepare test execution results and collaborate with cross-functional teams to investigate and resolve application issues.
- Leveraging Agentic AI and GitHub Copilot to create and enhance AI-powered testing agents, develop reusable testing skills, and support automated test script execution to improve testing efficiency and reliability.

LUMINAR TECHNOLAB, KOCHI,INDIA May 2024 – Dec 2024
INTERN-PYTHON DJANGO FULL STACK DEVELOPER

- Developed web application features using Python, Django, HTML, CSS, JavaScript, and Bootstrap.
- Designed and integrated RESTful APIs using Django REST Framework (DRF) for frontend-backend communication.
- Worked with SQLite, Django ORM, database tables, queries, and migrations.
- Debugged application issues and contributed to feature enhancements and application improvements.
- Collaborated with team members throughout development, testing, and debugging activities.

iRetail Software Solutions LLP, BANGALORE,INDIA May 2023 – June 2023
INTERN - PYTHON DEVELOPER

- Developed Python-based web application components using Python, HTML, CSS, and Bootstrap.
- Contributed to feature development, debugging, defect identification, and application improvements.
- Collaborated with team members to troubleshoot issues and improve application functionality.

EDUCATION

Cochin University of Science and Technology, BTECH in COMPUTER SCIENCE June 2020 – April 2024

- **G**PA:8.87/10.0

PROJECTS

Shell PLC – Downstream Operations Oct 2025 - Present
Client: Shell PLC
Role: Python Automation Engineer

- Execute and maintain Python-based automation for Web, API, and functional testing using BDD-based frameworks.
- Expanded coverage across Web, API, and Database layers using Python, Selenium, and BDD.
- Inspected REST services and microservices for consistent service behavior.
- Conducted backend verification using SQL on MS SQL Server, PostgreSQL, and Azure DB.
- Validated test timelines and defect priorities through Azure DevOps.
- Linked automation flows with CI/CD and generates Allure-based run summaries.

Johnson and johnson Medical Asia May 2025 - Oct 2025
Role: QA Engineer

- Performed functional, regression, and integration testing for web applications, identifying defects and validating fixes through retesting.
- Prepared and executed test cases, analyzed test results, and collaborated with development and QA teams to troubleshoot and resolve application issues.

UrbanLadder - Automated Testing Framework March 2025

- Developed an automated testing framework for the Urban Ladder website using Selenium, Cucumber (BDD), Page Object Model (POM), and Java.
- Implemented TestNG and Maven for structured test execution and Apache POI for data-driven testing.
- Integrated Jenkins for automated execution and generated test reports using Extent Reports.
- Used Git for version control and maintained reusable and scalable automation components.

HEALIO - HOSPITAL MANAGEMENT SYSTEM Nov 2024 - Dec 2024

- Developed a Django-based hospital management system with modules for doctor and patient records, appointments, pharmacy, and billing.
- Implemented backend functionality using Python, Django, Django ORM, and SQLite.
- Built responsive interfaces using HTML, CSS, Bootstrap, and JavaScript.

AGRO ADVISER Oct 2023 - April 2024

- Developed a Python-based application providing crop recommendations, fertilizer suggestions, and plant disease detection.
- Implemented machine learning and deep learning models for crop recommendation and image-based disease classification.
- Worked with Python and ML/DL techniques for predictive analysis and agricultural decision support.
